How to activate your 400 credits in Google Skills - Step by Step

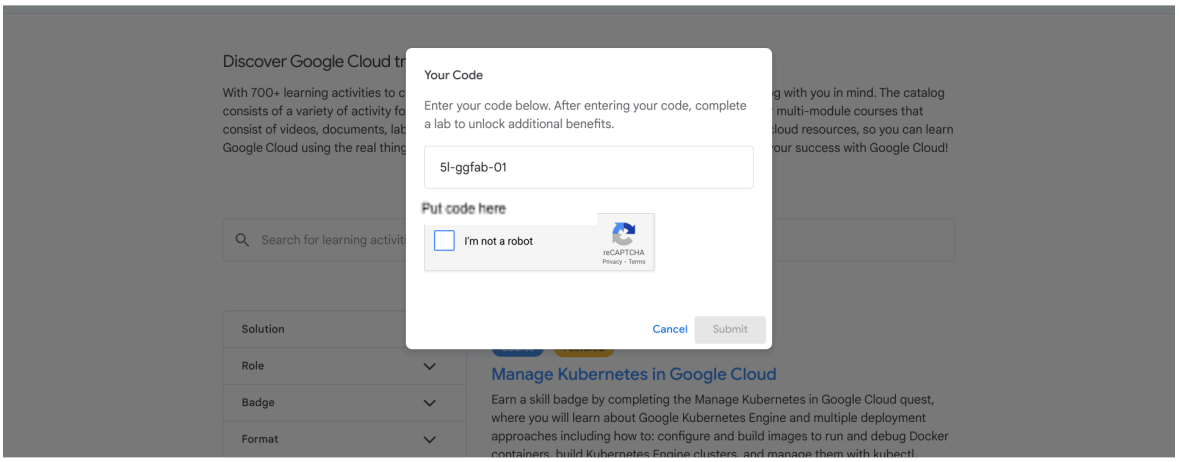

This will be a long guide. Make sure you read it carefully and follow every single step to successfully redeem your credits.

It's important that you activate your 400 credits in Google Skills as soon as possible. You need to do it before 21st Nov, 2026.There will be no extensions on this deadline.

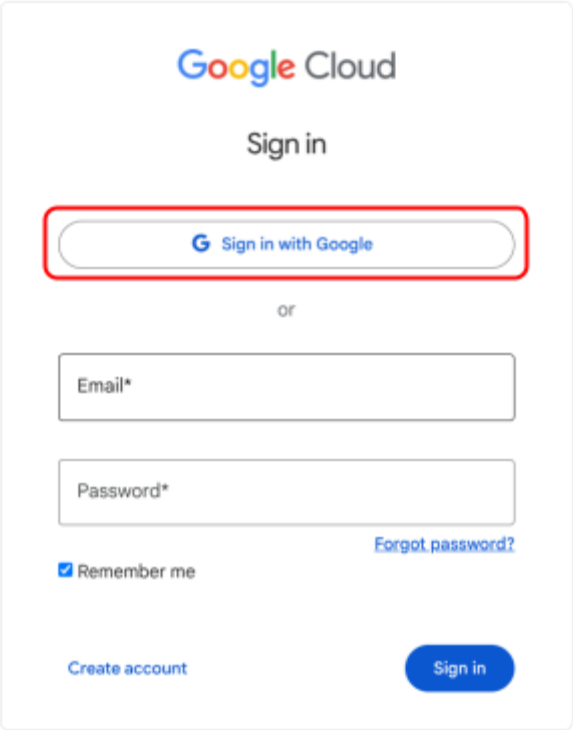

📢 If you encounter corporate email restrictions, please use a personal account. When signing in, select the "Sign in with Google" option. This approach can help bypass limitations sometimes present with corporate accounts.

Now follow carefully all these steps, *exactly* as they are shared below:

1. First, make sure you are logged out from Google Skills. Open the next link in an Incognito window: https://www.skills.google/catalog?event=Your. It will ask you to enter a code. Use this code: **1p-gcsgsc-67** making sure there are no blank spaces, and click on submit.

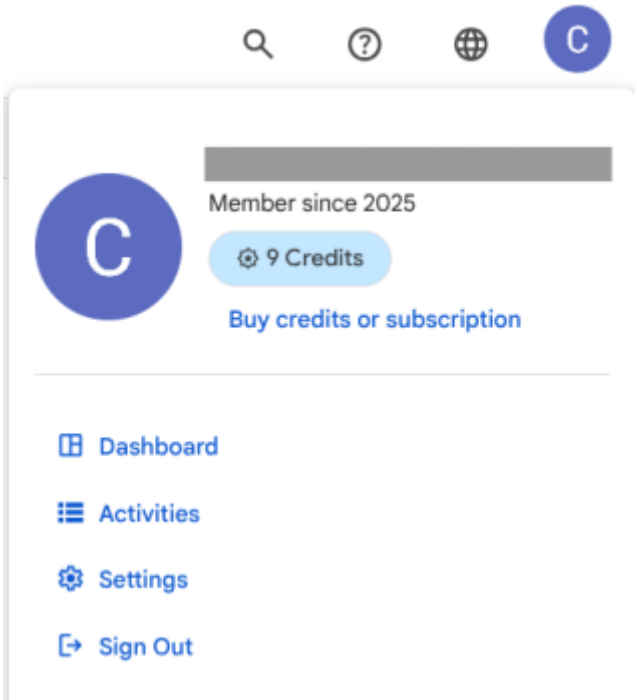

2. Now sign in to Google Skills using a personal account to avoid restrictions with your corporate email. Use a Google Account clicking on "Sign in with Google".

3. Once signed in, when clicking on your profile picture you should see the initial 9 credits available. You may see it says “Starter”. If this is the case, click there and you should be able to see 9 credits.

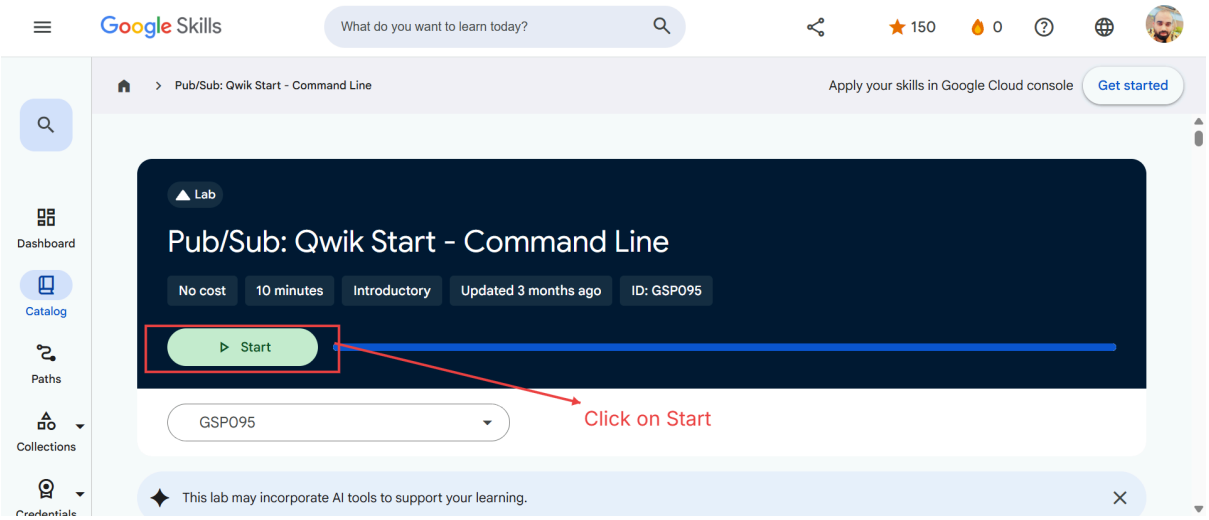

Important: If you don’t see the 9 credits you need to repeat the steps. You can’t continue with the activation until you see the 9 credits in your account.

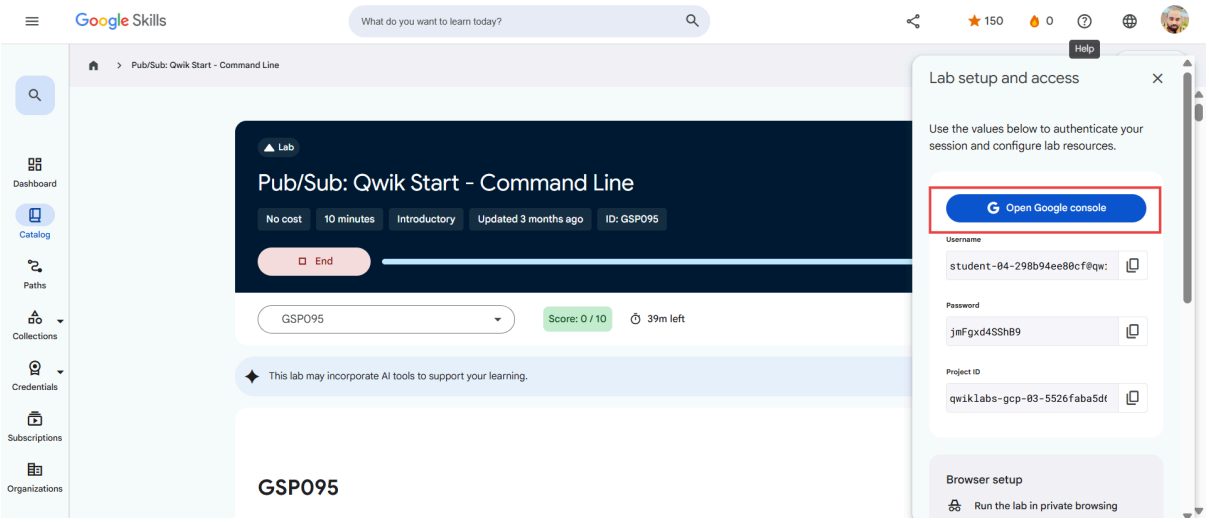

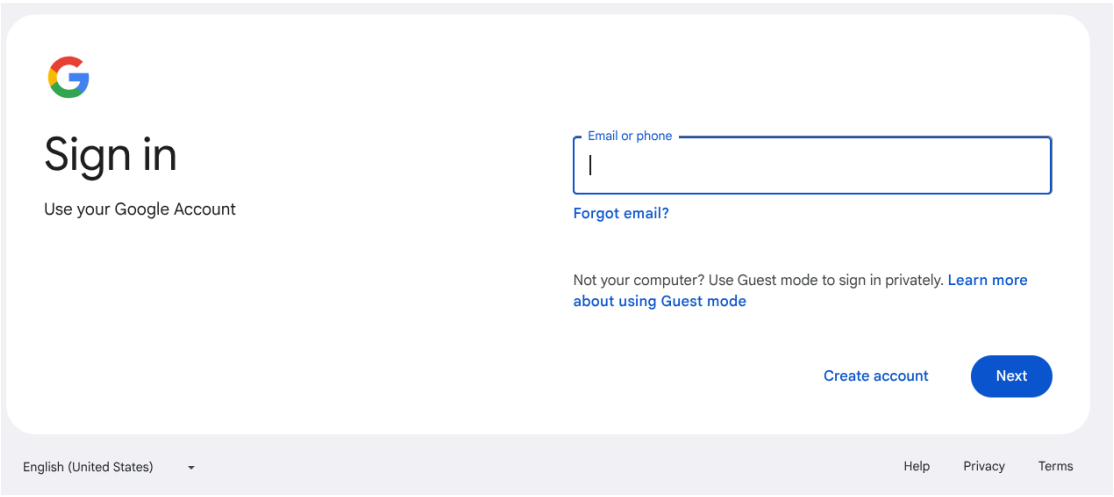

4. To activate the 400 credits on your profile, you must complete a lab. We suggest "**Pub/Sub: Qwik Start - Command Line"** which is a quick process, taking under 5 minutes. For this lab, we recommend using a Chrome incognito window. Simply click the link and select "Open on an incognito window."

!!We recommend completing the lab in English and avoid changing the language since some translations aren't updated and this could be a problem when following the steps.

5. Once you click on "**Start Lab**" you need to open the Google Cloud Console using an incognito window

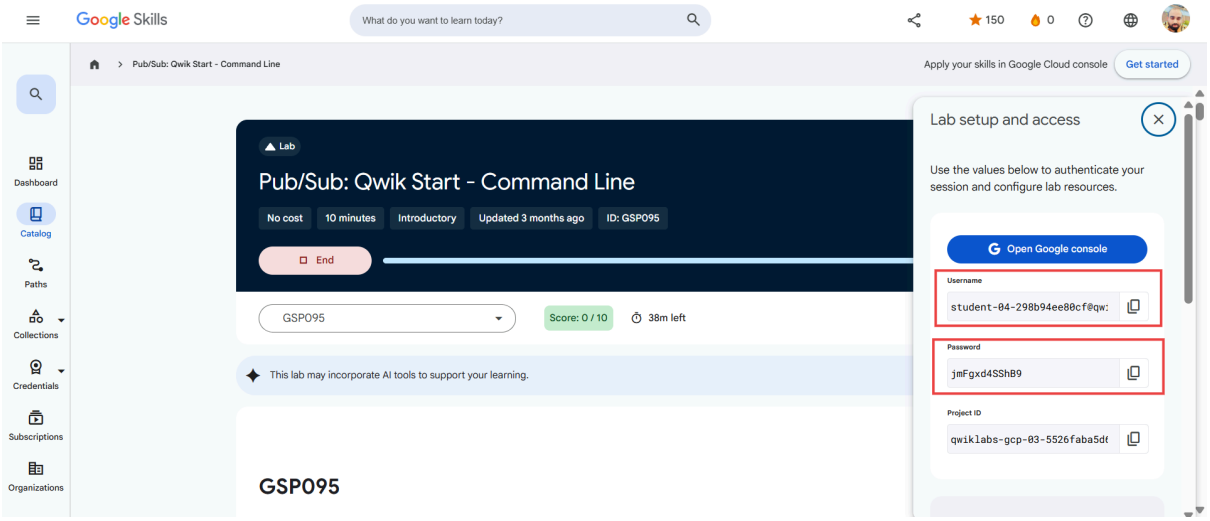

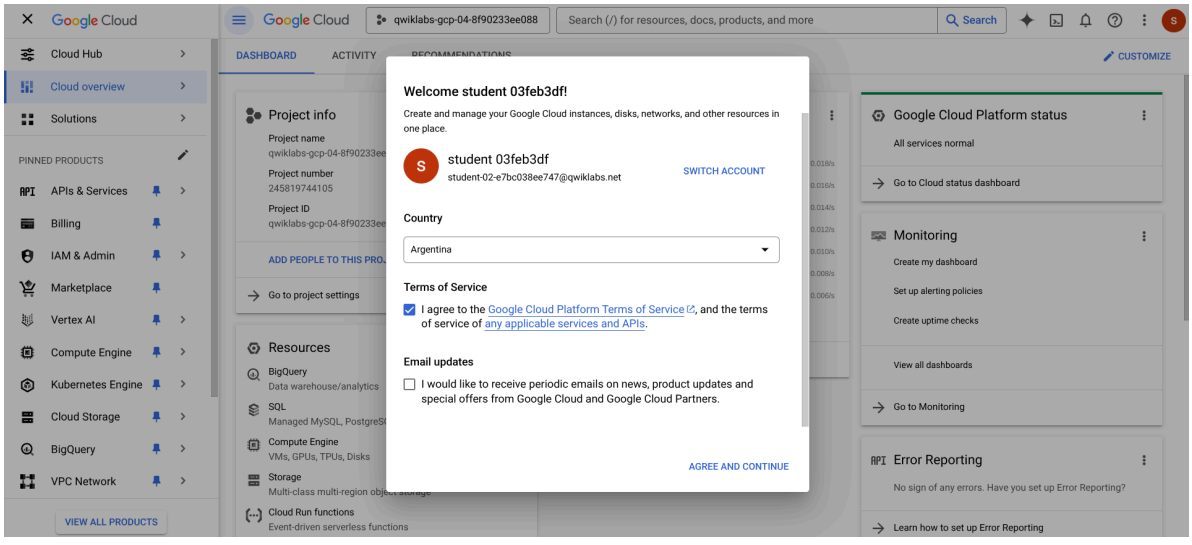

6. You will be asked to enter a Username and a Password.

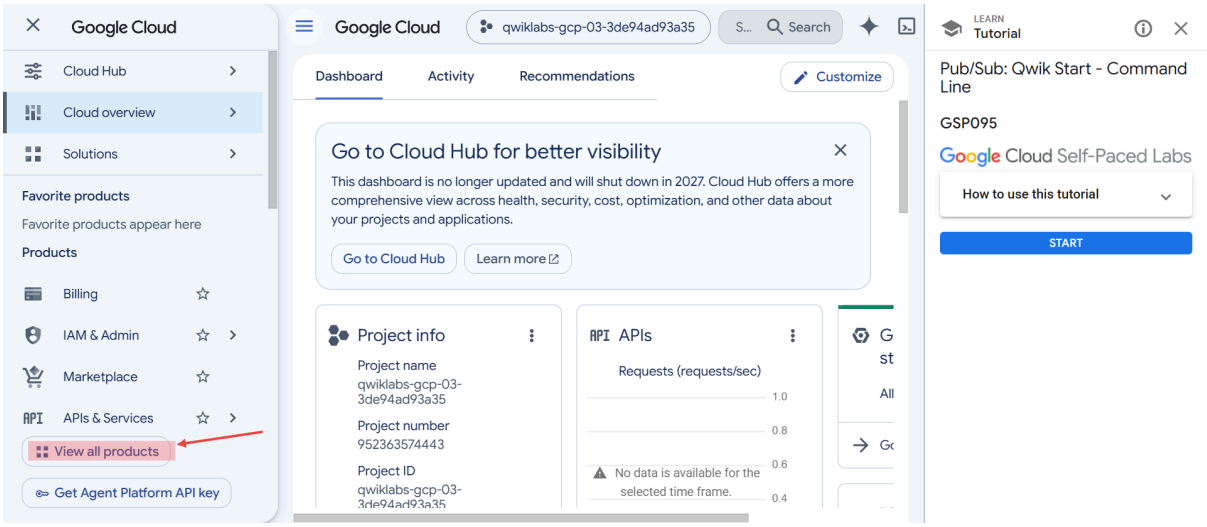

!!**Make sure to enter the temporal credentials that Google Skills gives you to perform this lab.** You can find it in the main page of the lab, as you can see in the screenshot below (the credentials in the image below are an example, make sure to enter the credentials Google Skills will provide you while performing this step). **Do not use your own email address to access the console, as it won't work.**

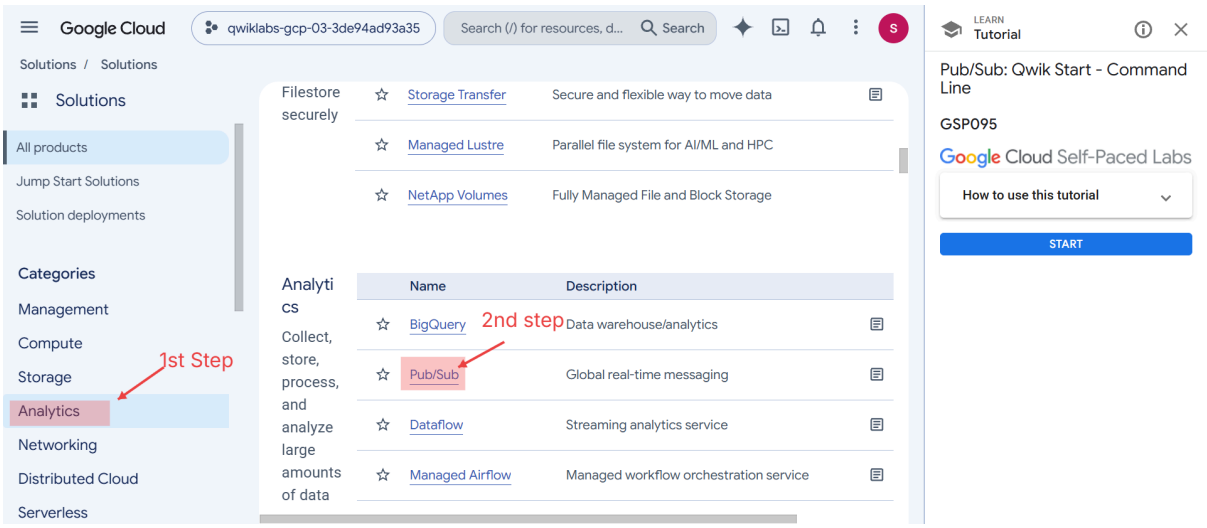

You will be asked to accept the terms of services.

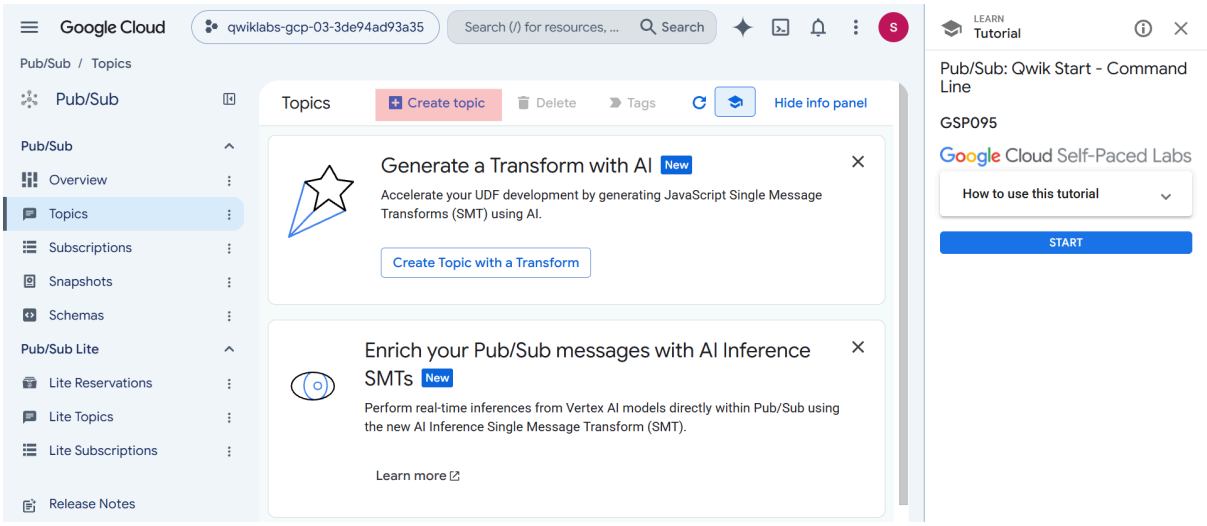

7. Click on **View All Products**

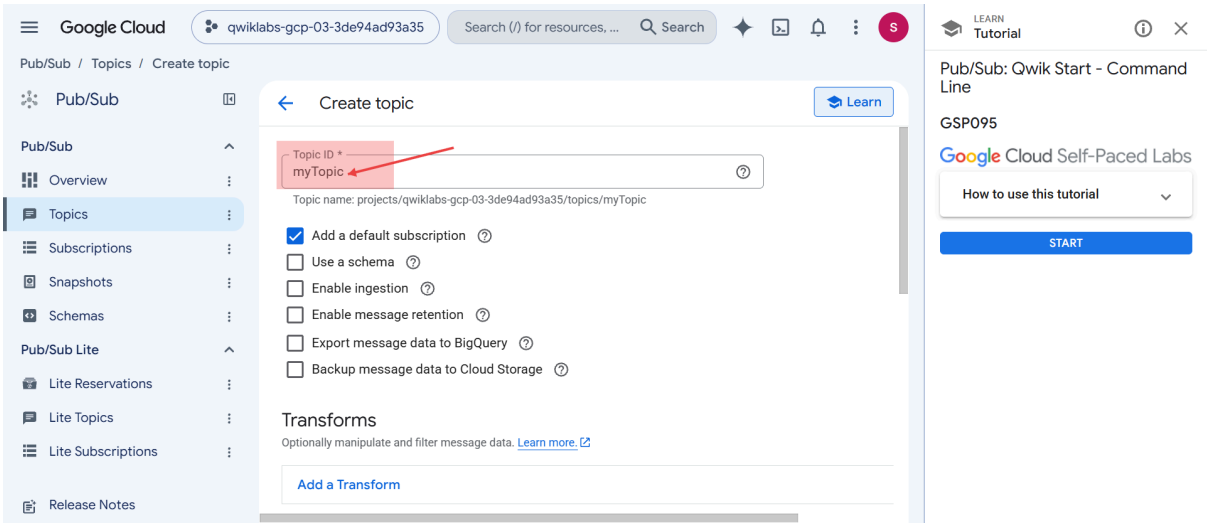

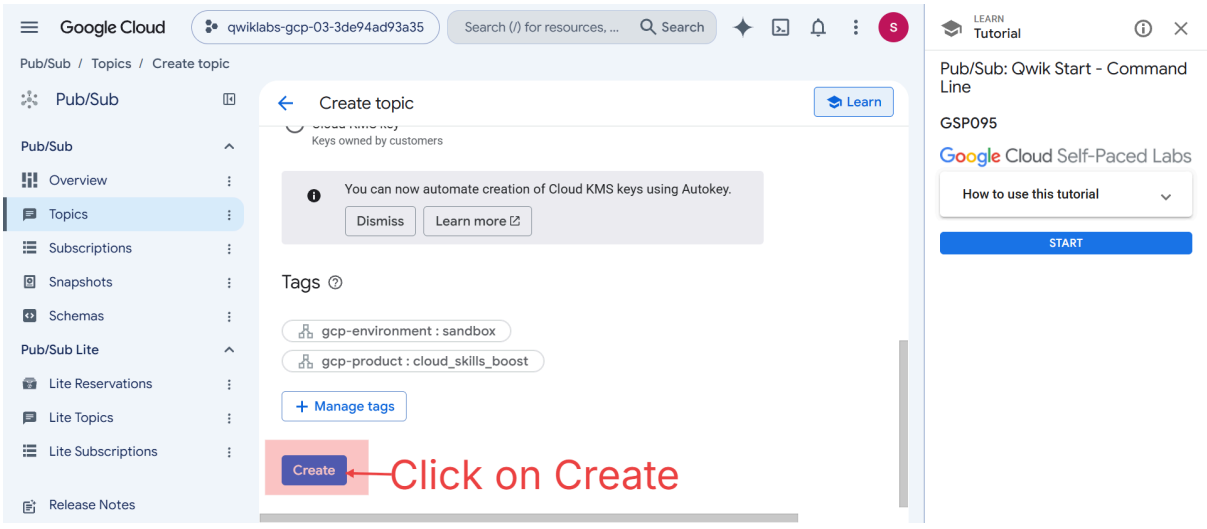

8. Click on **Analytics** and then select **Pub/Sub**

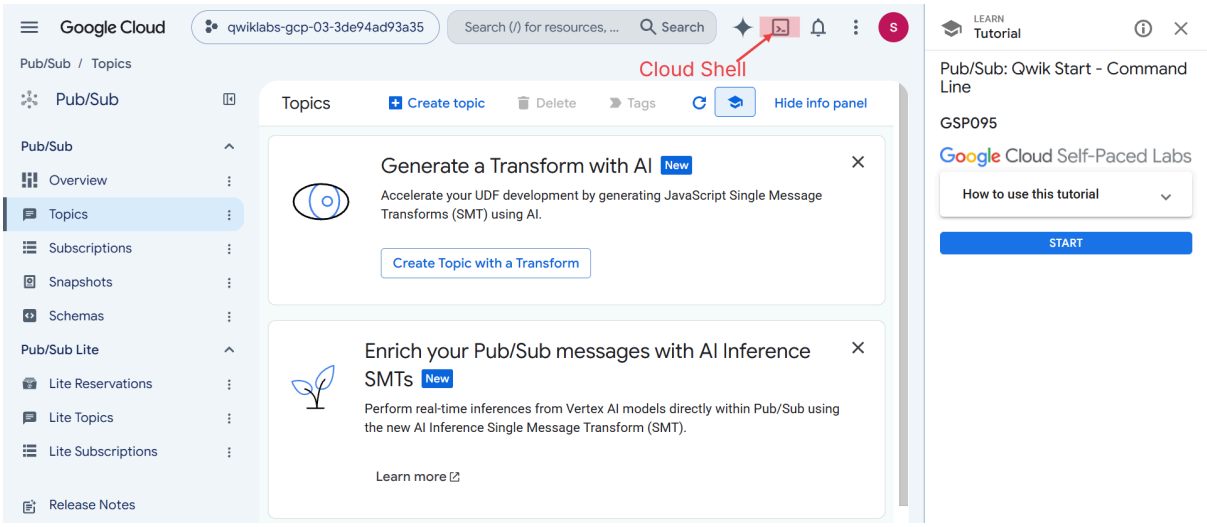

9. After clicking on **Pub/Sub** click on **Create topic** on the top center of the page and name it as **myTopic** and scroll down and click on **Create.**

How to use this tutorial
START

10. Click **Activate Cloud Shell** icon at the top of the Google Cloud console

11. Continue through the **Cloud Shell** information window.

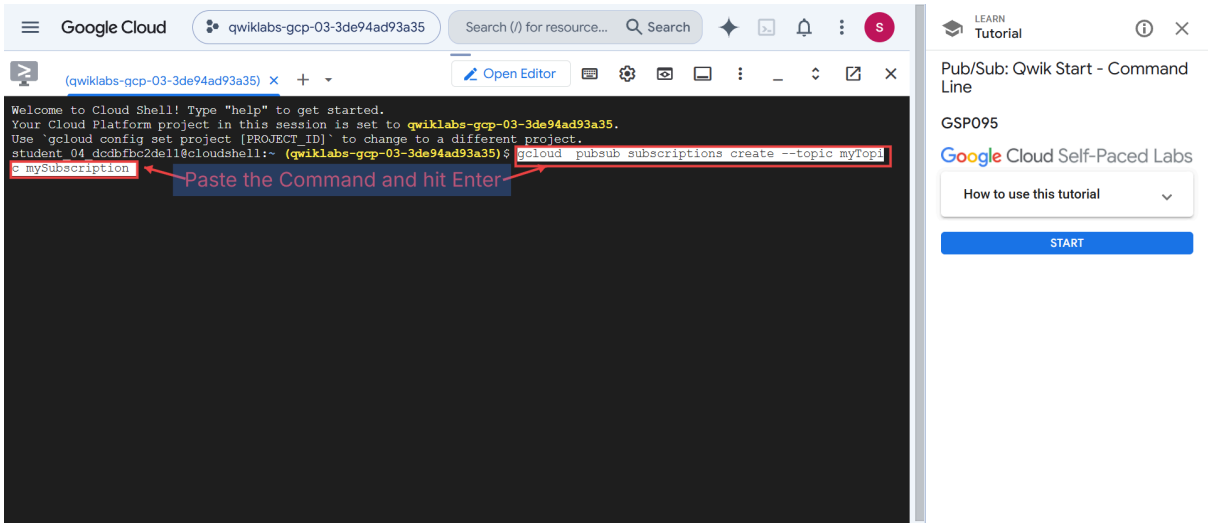

12. Click on **Authorize**

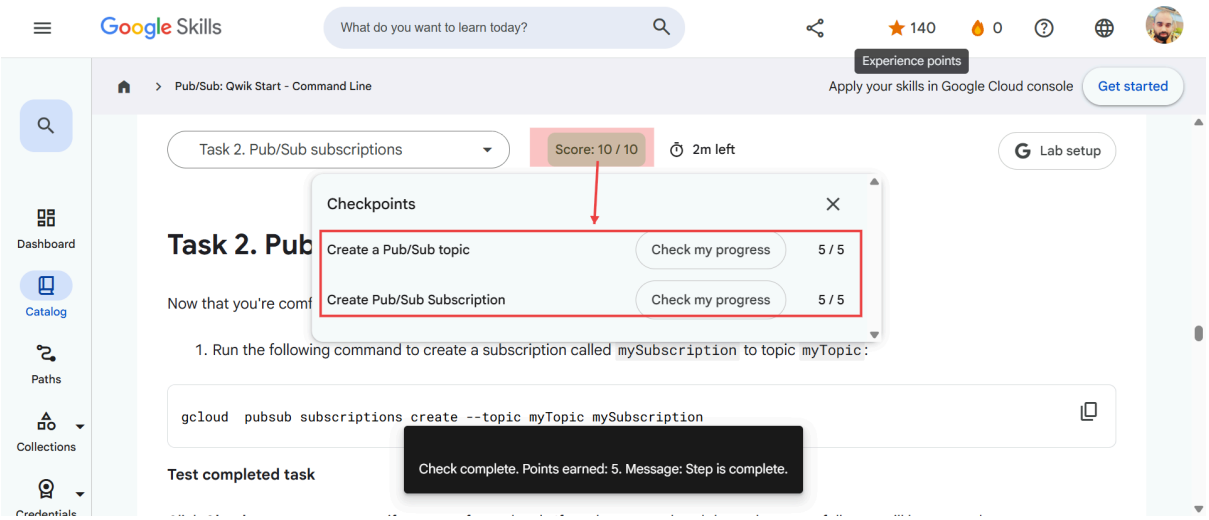

13. **Paste** the command below and hit **enter**:

gcloud pubsub subscriptions create --topic myTopic mySubscription

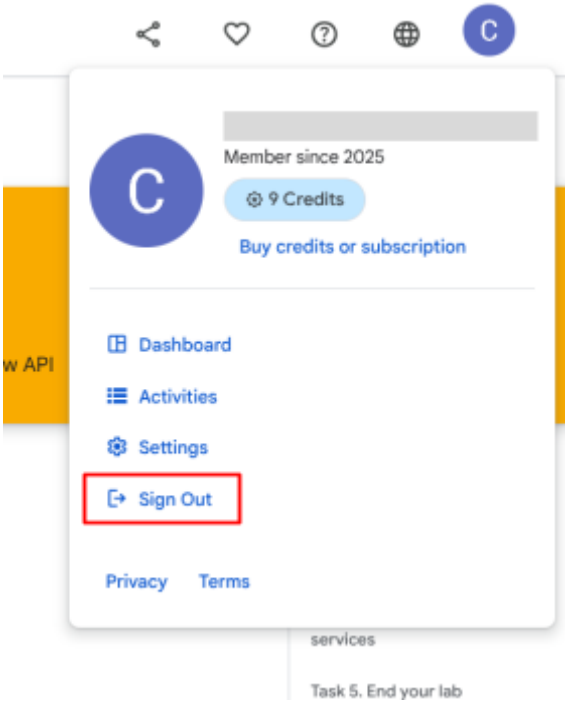

Now Check your progress and your will have both the tasks completed

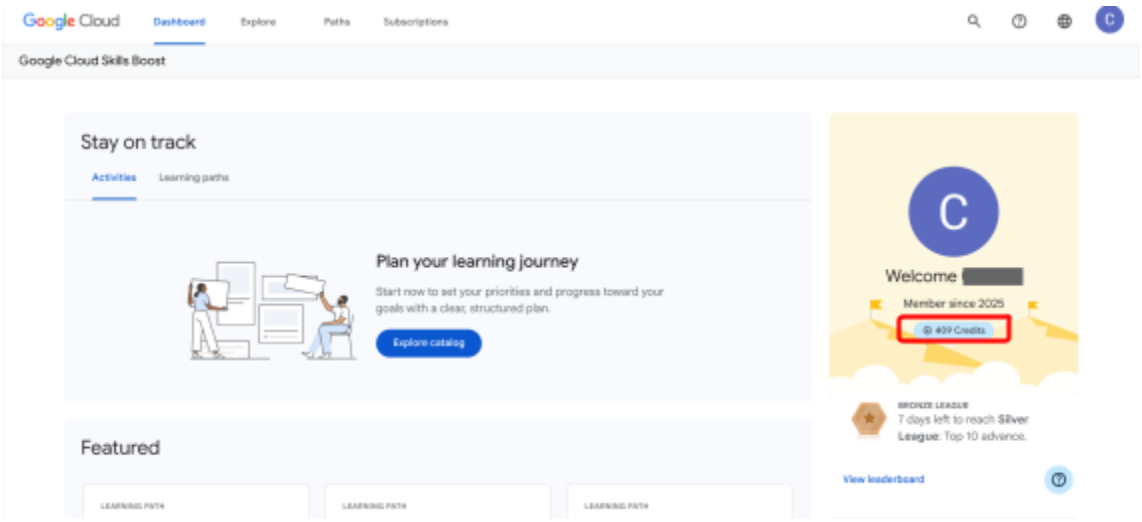

14. End the lab.

15. Now you sign out from your Google Skills account.

16. Now you sign in to your account and you should be able to see 400 credits when clicking in your profile picture! (If instead of credits you see it says “starter”, please click there and you should see the 400 credits as well)

If you still don't have access please reach out to me at daminichouhan@xwf.google.com and I'll do my best to help you. But if you follow each step as indicated, everything should be good 👍
